Dear Habitat supporters,

Thank you for helping us get into this house. It is amazing! It has been wonderful for all of us. We now have space to come together and enjoy time as a family, whereas before we were tripping over each other. It is nice that we can each have our own space, yet still have room to come together and have friends and family over.

Sammy is enjoying being a teenager and having her own room. She has also been learning to cook more as there is plenty of room in the kitchen for me to have helpers. She also likes to explore outside.

Thomas is continuing to make huge progress. He loves his swing in his room. He is now sitting properly in chairs and at the kitchen table, something he never really saw modeled for him before. He loves the yard too—to be able to play with his toys and explore.

Derek has been puttering around the yard doing "manly" things and is also enjoying the space. I like having a true kitchen and am trying to cook more and get more creative and healthy. I'm also enjoying the yard; getting outside is so good for the body.

I have included some pictures of us enjoying the space. Thanks again!

Kylie, Derek, Sammy and Thomas
